Forfatter: Hans Jørgen Biede

ISBN-10: 9788741264134

Sprog: Dansk

Filstørrelse: 2138 KB

**BESKRIVELSE**

Macroeconomics in theory and practise is an extension of the previous edition and focuses on financial stability and recent crises, including the crash of 2008 and the European debt crisis, both of which have had a major impact on the Danish and international economies. The book supplies its readers with a solid foundation in macroeconomic analysis, combining theory with economic reality. The book is designed to assist the student's learning in every way, and mathematical techniques are explained step-by-step. The book is divided into four parts. Part 1 deals with national income in the short and the long term. Part 2 analyses the balance of payments, currency markets and competitiveness. In part 3 the book describes the financial market, financial crises and financial stability. Part 4 deals with stabilization policy in the short and the long term. The content of the book is tailor-made for use on the Professional Bachelor's Degree programme as well as the Diploma Programmes in Business Administration (in Danish abbreviated HD) part I. The book combines with Hans Jørgen Biede's Microeconomics. See more at [hansreitzel.dk](http://hansreitzel.dk) There is a web page for the book which offers figures for download, exercises, edits, etc.

**HVAD SIGER GOOGLE OM DENNE BOG?**

Macroeconomics in theory and practise is an extension of the previous edition and focuses on financial stability and recent crises, including the crash of 2008 and ...

This book provides a comprehensive discussion on macroeconomics by exploring the different stages of growth of macroeconomics - classical, Keynesian and post-Keynesian.
